

# Ruby Array - Deletion

The array class has various methods of removing elements from the array.

Let's look at the array

```
arr = [5, 6, 5, 4, 3, 1, 2, 5, 4, 3, 3, 3]
```

- Delete an element from the end of the array

```
> arr.pop  
=> 3
```

- Delete an element from the beginning of the array

```
> arr.shift  
=> 5
```

- Delete an element at a given position

```
> arr.delete_at(2)  
=> 4
```

- Delete all occurrences of a given element

```
> arr.delete(5)  
=> 5  
> arr  
=> [6, 3, 1, 2, 4, 3, 3]
```

Your task is to complete the functions below using syntax as explained above.
