

# Looping and Skipping

*for* loops in Bash can be used in several ways:

- iterating between two integers, *a* and *b*
- iterating between two integers, *a* and *b*, and incrementing by *c* each time
- iterating through the elements of an array, etc.

Your task is to use *for* loops to display only *odd* natural numbers from **1** to **99**.

## Input

*There is no input.*

## Output

```
1
3
5
.
.
.
.
.
99
```

## Recommended Resources

A quick but useful tutorial for bash newcomers is [here](#).

Handling input is documented and explained quite well on [this page](#).

Different ways in which *for* loops may be used are explained with examples [here](#).
