

Matching Word & Non-Word Character

`\w`

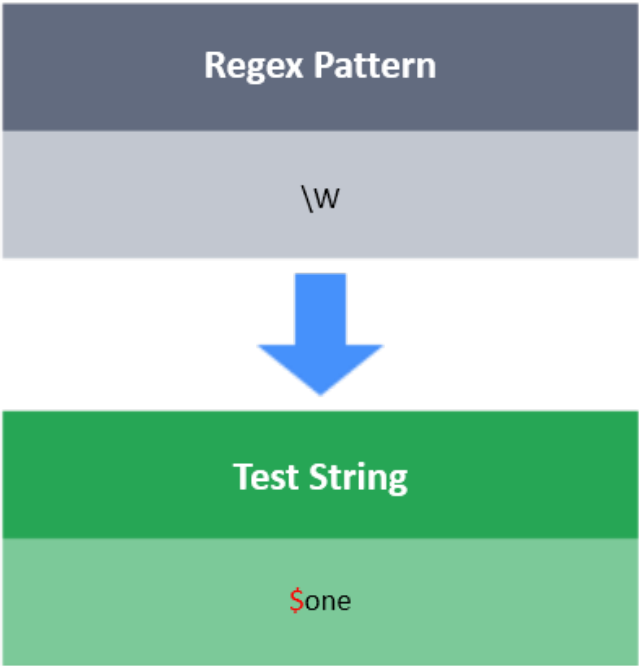

The expression `\w` will match any word character.
Word characters include alphanumeric characters (*a-z*, *A-Z* and *0-9*) and underscores (*_*).

In the above image, Regex Pattern is matched with the Test String.

`\W`

`\W` matches any non-word character.
Non-word characters include characters other than alphanumeric characters (*a-z*, *A-Z* and *0-9*) and underscore (*_*).

In the above image, Regex Pattern is matched with the Test String.

You have a test string ***S***. Your task is to match the pattern ***xxxXXXXXXXXXXXXXxxx***
Here ***x*** denotes any word character and ***X*** denotes any non-word character.

Note

This is a regex only challenge. You are not required to write any code.
You only have to fill the regex pattern in the blank ().
